

Child Safety Screens Invention In Search of Licensee

An innovative new product designed to eliminate the potential for one of the most catastrophic accidents possible, the ***Child Safety Screens***, has been developed by Robert Thompson of Vacaville, California. The invention's unique design provides both peace of mind and thorough protection with respect to the possibility of a small child falling out of a window.

The old adage of an overwhelming majority of accidents occurring within or near one's home certainly seems to hold true when it comes to small children. Particularly in the toddler and preschool years, when they are already mobile and are still spending a majority of time at home, the potential for accidents seems to be particularly prevalent. Apartment windows and balconies are an especially dangerous attraction for curious children, and the main culprit for some of the most horrific incidents involving serious injury or death to a minor.

The ***Child Safety Screens*** will eliminate the possibility of a small child falling from an elevated area. The product will be made from durable plastic and metal, and will be easy to implement on a variety of different windows. It will also lock and unlock with ease, allowing even users with physical limitations to operate it effectively. Through its proprietary features, the Child Safety Screens will be instrumental in the preventing of serious injuries and deaths.

Mr. Thompson now seeks a third party licensee to manufacture, market, and distribute the product for him under a royalty agreement. Potential licensees in the child safety accessories industry are currently being targeted as candidates to eventually commercialize ***Child Safety Screens*** on a worldwide basis.

In February 2012, Mr. Thompson contracted Miami, Florida-based product management services leader Innovation Direct™ to represent the ***Child Safety Screens*** to potential licensees for a 2 year period. Innovation Direct™ obtains the maximum amount of exposure for the products that it represents through its unique and patented licensing methodology and its participation in multiple and diverse industry-leading trade shows each year. Exhibits that Innovation Direct™ has attended in recent years include the SHOT Show, the International Home and Housewares Show, the National Hardware Show, Licensing International, the SEMA and AAPEX Shows and the ERA D2C Convention.

Potential licensees interested in obtaining more information about ***Child Safety Screens*** and discussing licensing opportunities with respect to the product can contact the Manufacturer Response Department of Innovation Direct™ at (877) 991-0909 ext. 4285 or at MR@innovationdirectonline.com.
