

EZ Burn

Detailed Description

The ***EZ Burn*** is a hair styling device that eliminates the need to utilize a lighter or other methods to burn synthetic hair during the styling process. As described by the inventor, the product will mainly be used by stylists working on the hair of African Americans. The product will be shaped much like a conventional hair dryer and with control buttons on its main vertical body. It will have a charging base that it sits in when not in use and will therefore have the capability of being used in cordless fashion, adding to the convenience it offers.
