Drilling Tubular Turbo Screen Cleaner Invention In Search of Licensee

An innovative new product designed to effectively address a common problem in the drilling industry, the ***Drilling Tubular Turbo Screen Cleaner***, has been developed by Robert Capaldi of Perryton, Texas. The invention's unique design enables its users to quickly and effortlessly clear debris out of pipe screens.

The ***Drilling Tubular Turbo Screen Cleaner's*** proprietary features enable the product to perform its intended functions without any direct exertion by the user. It will help insure cleaner down hole operations while drilling oil and gas wells. It will save its users considerable time when cleaning debris out of screen holes. Additionally, the ***Drilling Tubular Turbo Screen Cleaner*** is fully adjustable, allowing it to fit a variety of differently sized screen. Furthermore, the product will be fabricated from durable materials, adding to its appeal.

The inventor of the ***Drilling Tubular Turbo Screen Cleaner*** now seeks a third party licensee to manufacture, market, and distribute the product for him under a royalty agreement. Potential licensees in the drilling accessories industry are currently being targeted as candidates to eventually commercialize the ***Drilling Tubular Turbo Screen Cleaner*** on a worldwide basis.

In August 2013, Mr. Capaldi contracted Miami, Florida-based product management services leader Innovation Direct™ to represent the ***Drilling Tubular Turbo Screen Cleaner*** to potential licensees for a 2 year period. Innovation Direct™ obtains the maximum amount of exposure for the products that it represents through its unique and patented licensing methodology and its participation in multiple and diverse industry-leading trade shows each year. Exhibits that Innovation Direct™ has attended in recent years include the SHOT Show, the International Home and Housewares Show, the World of Concrete Show, the National Hardware Show, Licensing International, the SEMA and AAPEX Shows and the ERA D2C Convention.
