Mechanical Controlled/Automatic Hydrating Device Invention In Search of Licensee

An innovative new product designed to serve an important purpose for the infirm and disabled, the ***Mechanical Controlled/Automatic Hydrating Device***, has been developed by Olivia Duron-Smith. The invention's unique design enables medical professionals and caregivers to perform a task vital to a sick person's wellbeing.

The ***Mechanical Controlled/Automatic Hydrating Device***'s proprietary features allow for a measured quantity of water to be supplied to a patient's mouth automatically. It allows for the dispensing of water to be timed to a specific desired interval. Additionally, the ***Mechanical Controlled/Automatic Hydrating Device*** can reduce the cost of medical treatment by being simple enough for a layman to operate within a residential setting. Furthermore, the ***Mechanical Controlled/Automatic Hydrating Device*** does not require specialized training in order to operate. The product also eliminates the need for specialized needles and other paraphernalia related to administering intravenous fluids.

The ***Mechanical Controlled/Automatic Hydrating Device*** is also the subject of **Utility Patent 8,460,234 B1** within the United States Patent and Trademark Office.

The inventor of the ***Mechanical Controlled/Automatic Hydrating Device*** now seeks a third party licensee to manufacture, market, and distribute the product for her under a royalty agreement. Potential licensees in the personal medical accessories industry are currently being targeted as candidates to eventually commercialize the ***Mechanical Controlled/Automatic Hydrating Device*** on a worldwide basis.

In August 2013, Mrs. Duron-Smith contracted Miami, Florida-based product management services leader Innovation Direct™ to represent the ***Mechanical Controlled/Automatic Hydrating Device*** to potential licensees for a 2 year period. Innovation Direct™ obtains the maximum amount of exposure for the products that it represents through its unique and patented licensing methodology and its participation in multiple and diverse industry-leading trade shows each year. Exhibits that Innovation Direct™ has attended in recent years include the SHOT Show, the International Home and Housewares Show, the World of Concrete Show, the National Hardware Show, Licensing International, the SEMA and AAPEX Shows and the ERA D2C Convention.

Potential licensees interested in obtaining more information about the ***Mechanical Controlled/Automatic Hydrating Device*** and discussing licensing opportunities with respect to the product can contact the Manufacturer Response Department of Innovation Direct™ at (877) 991-0909 ext. 4285 or at MR@innovationdirectonline.com.
