Chamfering Tool Invention In Search of Licensee

An innovative new product designed to serve an essential purpose when beveling the edges of a variety of materials, the ***Chamfering Tool***, has been developed by Nita K. Sunderland of Washington, Illinois. The invention's unique design enables it to make the sculpting of edges much easier and accurate.

The ***Chamfering Tool*** features a guide that helps control the angle of the bevel. Additionally, the ***Chamfering Tool*** provides a much more professional finish than that accomplished with free-hand grinding. Furthermore, it works equally effectively with a number of different surfaces, including stone, wood, and metal. The product also conveniently mounts on a hand-held grinder. Moreover, the ***Chamfering Tool*** saves money by both restoring older and damaged material and by eliminating the need for a trained mason to have to be hired to do free-hand beveling. It will also be competitively priced and made from durable, high carbon steel, adding to its appeal and making it a wise investment.

The inventor of the ***Chamfering Tool*** has developed a working prototype that has been utilized with success. The ***Chamfering Tool*** is also the subject of **Utility Patent # 8,267,751 B2** within the United States Patent and Trademark Office.

Mrs. Sunderland now seeks a third party licensee to manufacture, market, and distribute the product for her under a royalty agreement. Potential licensees in the construction accessories industry are currently being targeted as candidates to eventually commercialize the ***Chamfering Tool*** on a worldwide basis.

In February 2014, Mrs. Sunderland contracted Miami, Florida-based product management services leader Innovation Direct™ to represent the ***Chamfering Tool*** to potential licensees for a 2 year period. Innovation Direct™ obtains the maximum amount of exposure for the products that it represents through its unique and patented licensing methodology and its participation in multiple and diverse industry-leading trade shows each year. Exhibits that Innovation Direct™ has attended in recent years include the SHOT Show, the International Home and Housewares Show, the World of Concrete Show, the National Hardware Show, Licensing International, the SEMA and AAPEX Shows and the ERA D2C Convention.

Potential licensees interested in obtaining more information about the ***Chamfering Tool*** and discussing licensing opportunities with respect to the product can contact the Manufacturer Response Department of Innovation Direct™ at (877) 991-0909 ext. 4285 or at MR@innovationdirectonline.com.
