

The Sentinel 1013 Invention In Search of Licensee

An innovative and highly valuable new residential and commercial security product, the ***Sentinel 1013***, has been developed by James T. Rairigh of Spanaway, Washington. The invention's unique design helps insure property owners that they are immediately alerted to any potential break-ins on their property.

The ***Sentinel 1013*** significantly reduces the chances of loss of valuables and personal property and the associated expenses involved in replacing them. Additionally, the ***Sentinel 1013*** saves consumers considerable amounts of money by eliminating the need for ongoing contracts with security companies for monitoring services. Furthermore, it is easy to implement in any residential property. Moreover, the ***Sentinel 1013*** provides priceless peace of mind for home and business owners, including those with property that is temporarily vacant. It will also be competitively priced and made from durable materials, adding to its appeal.

The ***Sentinel 1013*** is also currently in Patent Pending status within the United States Patent and Trademark Office.

Mr. Rairigh now seeks a third party licensee to manufacture, market, and distribute the product for him under a royalty agreement. Potential licensees in the security products industry are currently being targeted as candidates to eventually commercialize the ***Sentinel 1013*** on a worldwide basis.

In August 2014, Mr. Rairigh contracted Miami, Florida-based product management services leader Innovation Direct™ to represent the ***Sentinel 1013*** to potential licensees for a 2 year period. *Innovation Direct*™ obtains the maximum amount of exposure for the products that it represents through its unique and patented licensing methodology and its participation in multiple and diverse industry-leading trade shows each year. Exhibits that *Innovation Direct*™ has attended in recent years include the SHOT Show, the International Home and Housewares Show, the World of Concrete Show, the National Hardware Show, Licensing International, the SEMA and AAPEX Shows and the ERA D2C Convention.

Potential licensees interested in obtaining more information about the ***Sentinel 1013*** and discussing licensing opportunities with respect to the product can contact the Manufacturer Response Department of *Innovation Direct*™ at (877) 991-0909 ext. 4285 or at MR@innovationdirectonline.com.
